WHAT IS EPMware?

EPMware software is designed for the business user to regain control of their metadata. With built-in Oracle Hyperion intelligence, sharing of hierarchies across applications is a seamless process, creating dimensional consistency across all your applications while enforcing data governance.

The source of truth for all master data

Direct Integration

Deploy directly to target applications with out of the box adapters

HFM – Essbase – Planning – FDMee – EPMA - DRM

Support for complex transactions like moves, renames, reorder, in addition to create members, and remove members.

Oracle Cloud: FCCS – EPBCS – ARCS - PCMCS

Cloud Rest API connectivity to ensure secure and guaranteed deployment to all cloud applications.

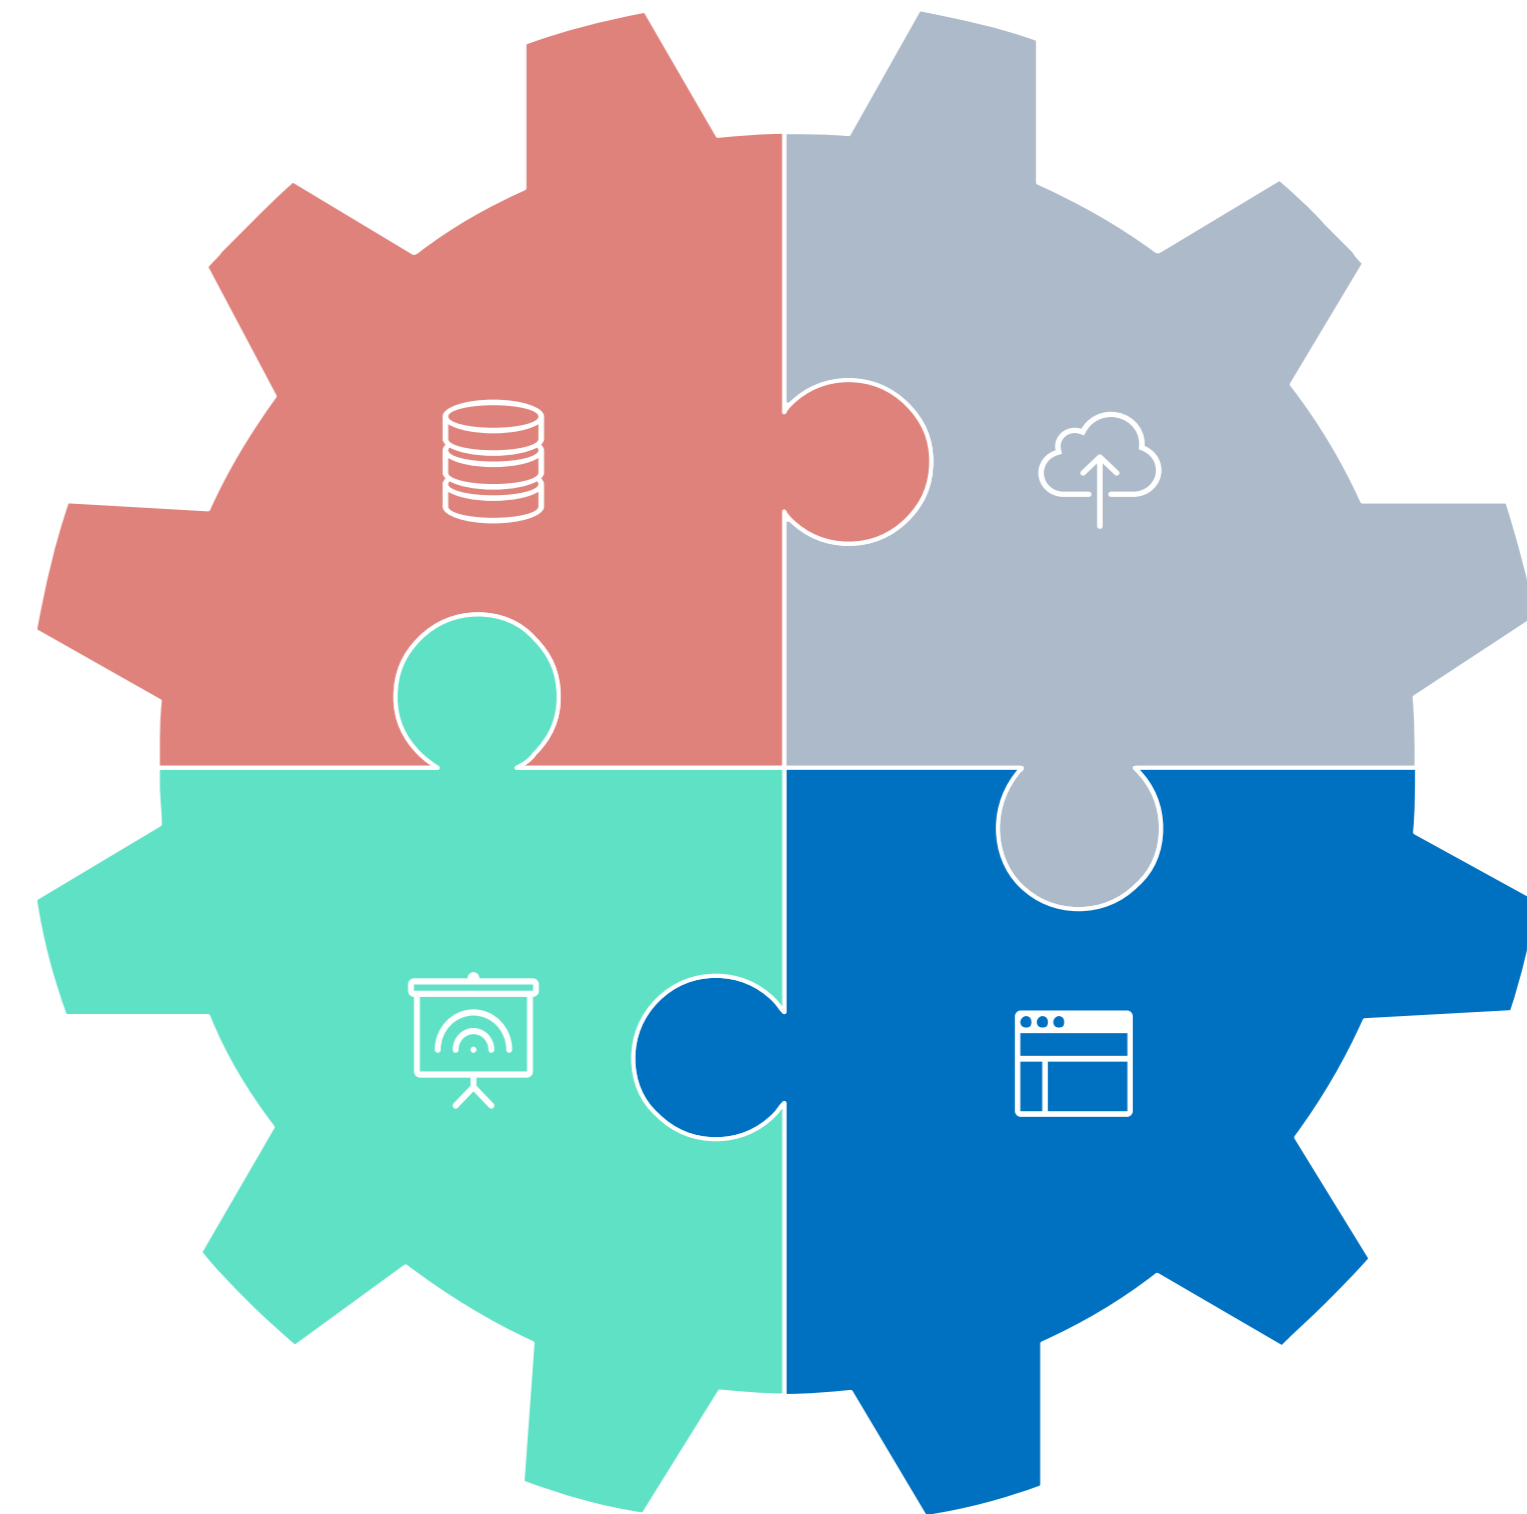

EBS – SAP - Peoplesoft

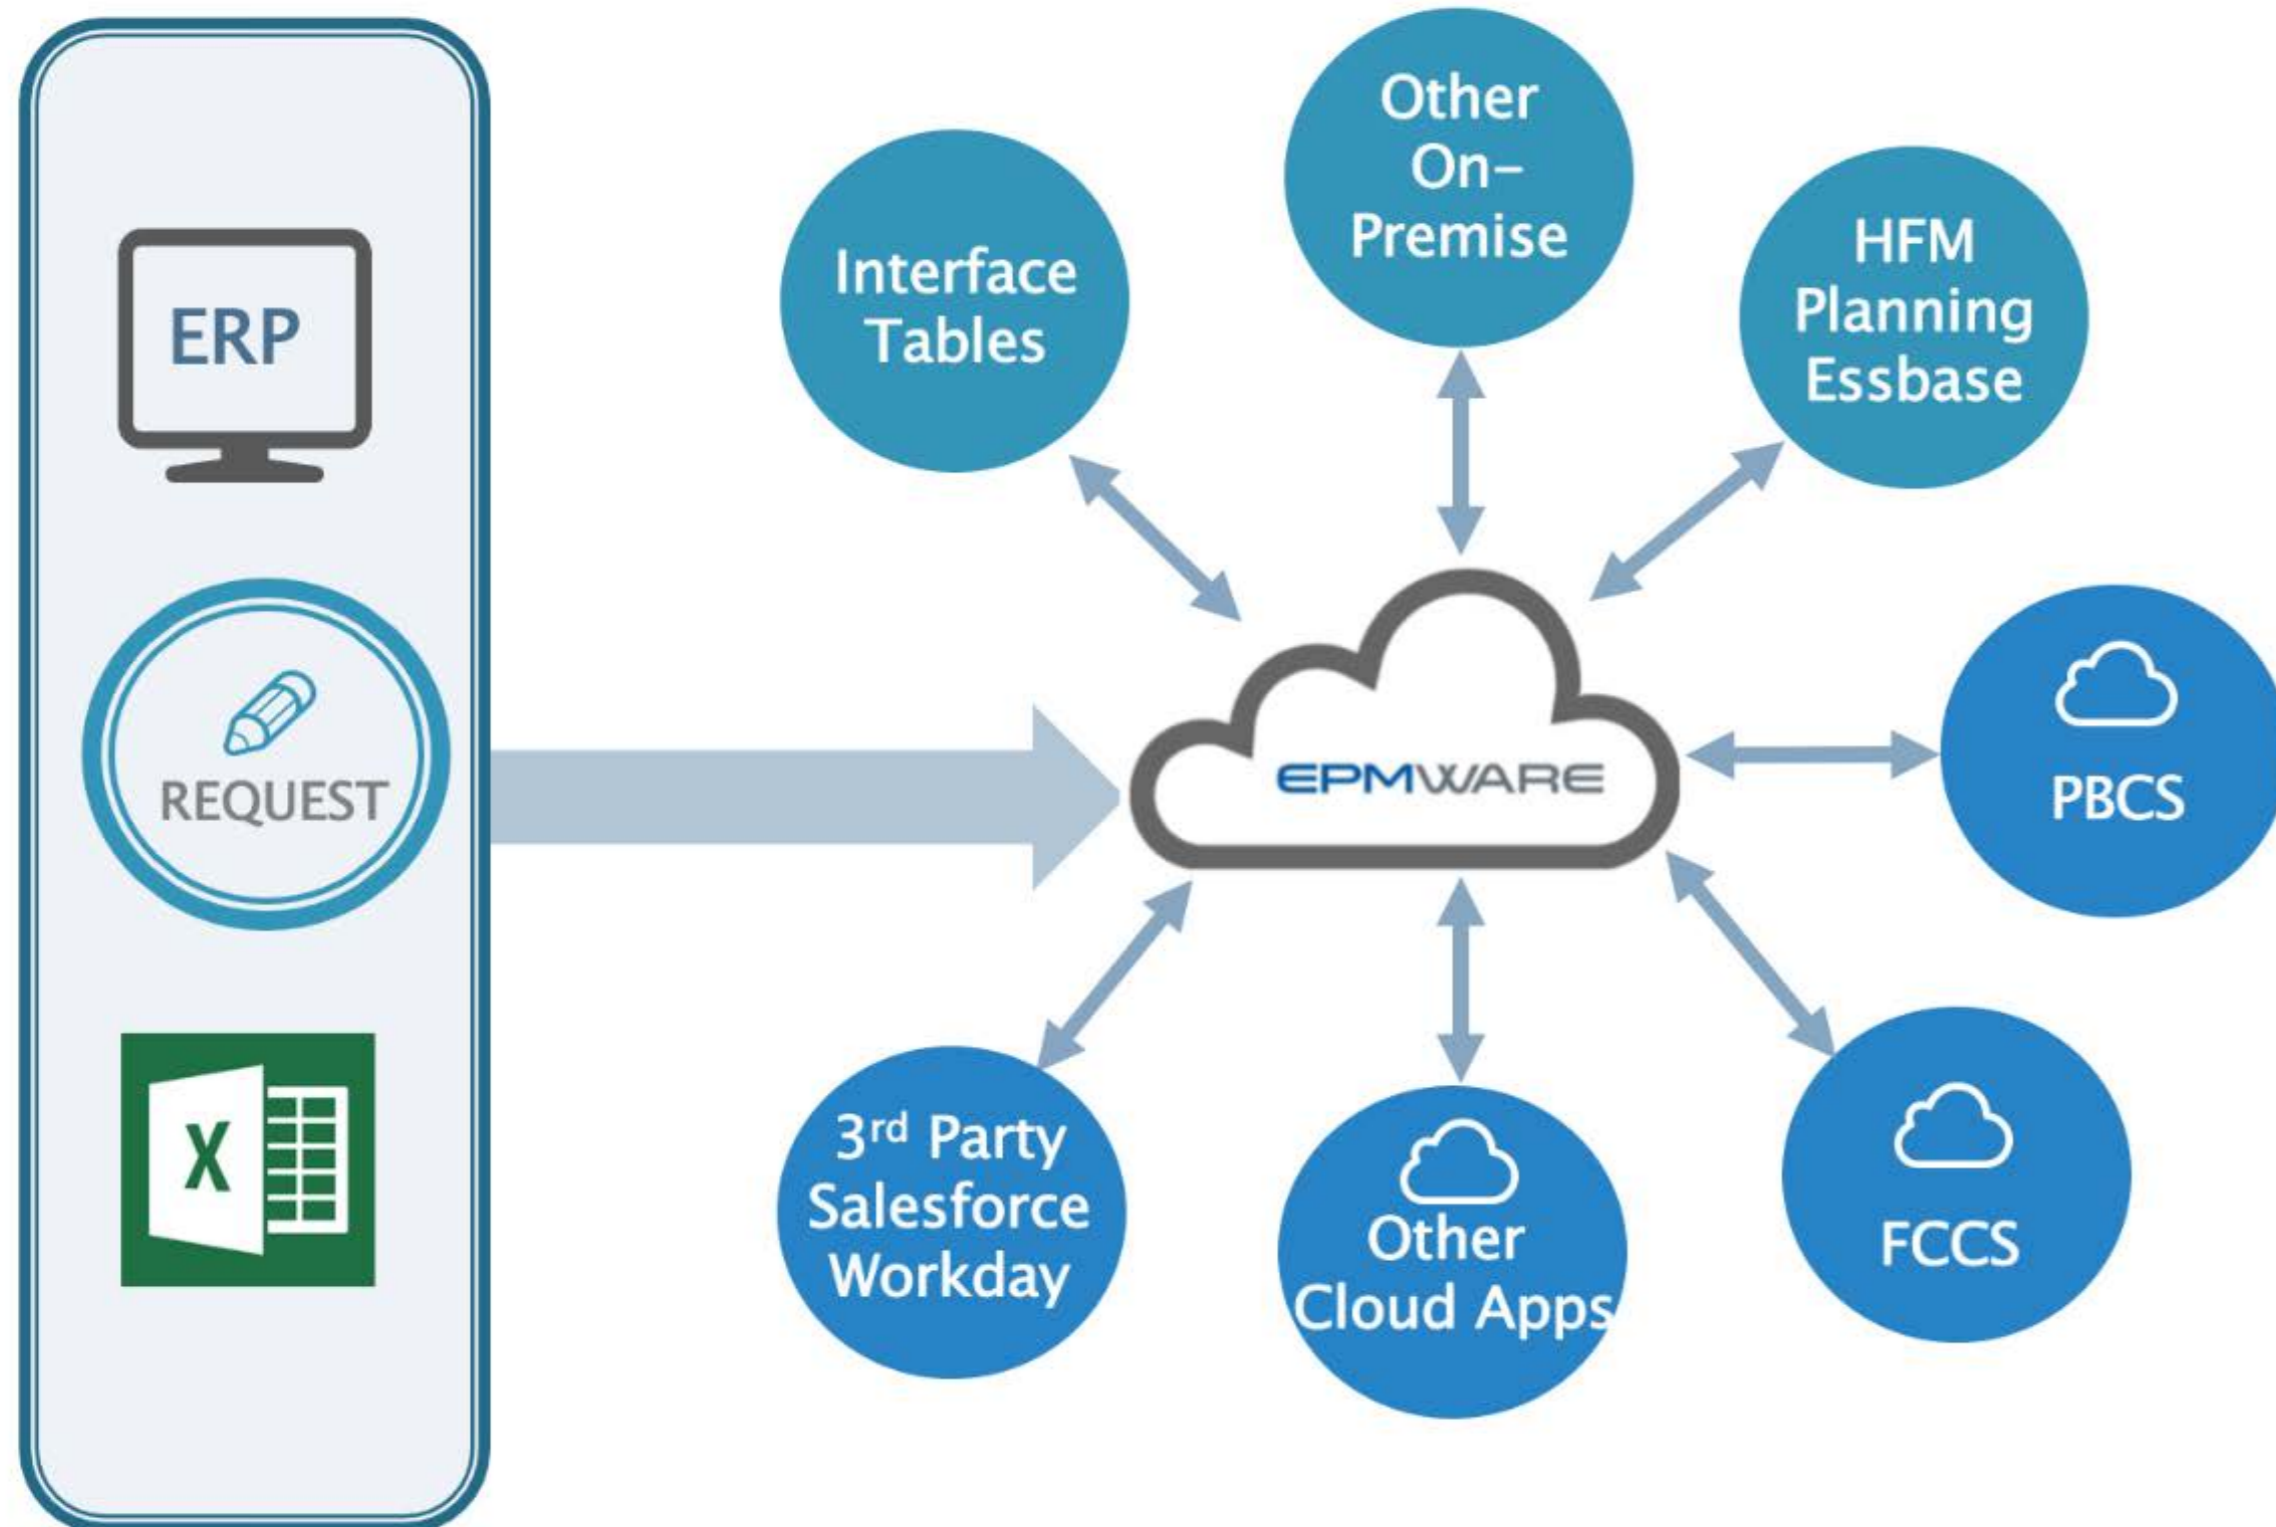

ERP integration available through APIs or interface tables

Anaplan – Cognos / TM1 – Salesforce – Netsuite - Onestream

Quickly connect alternate EPM applications

Creating Metadata

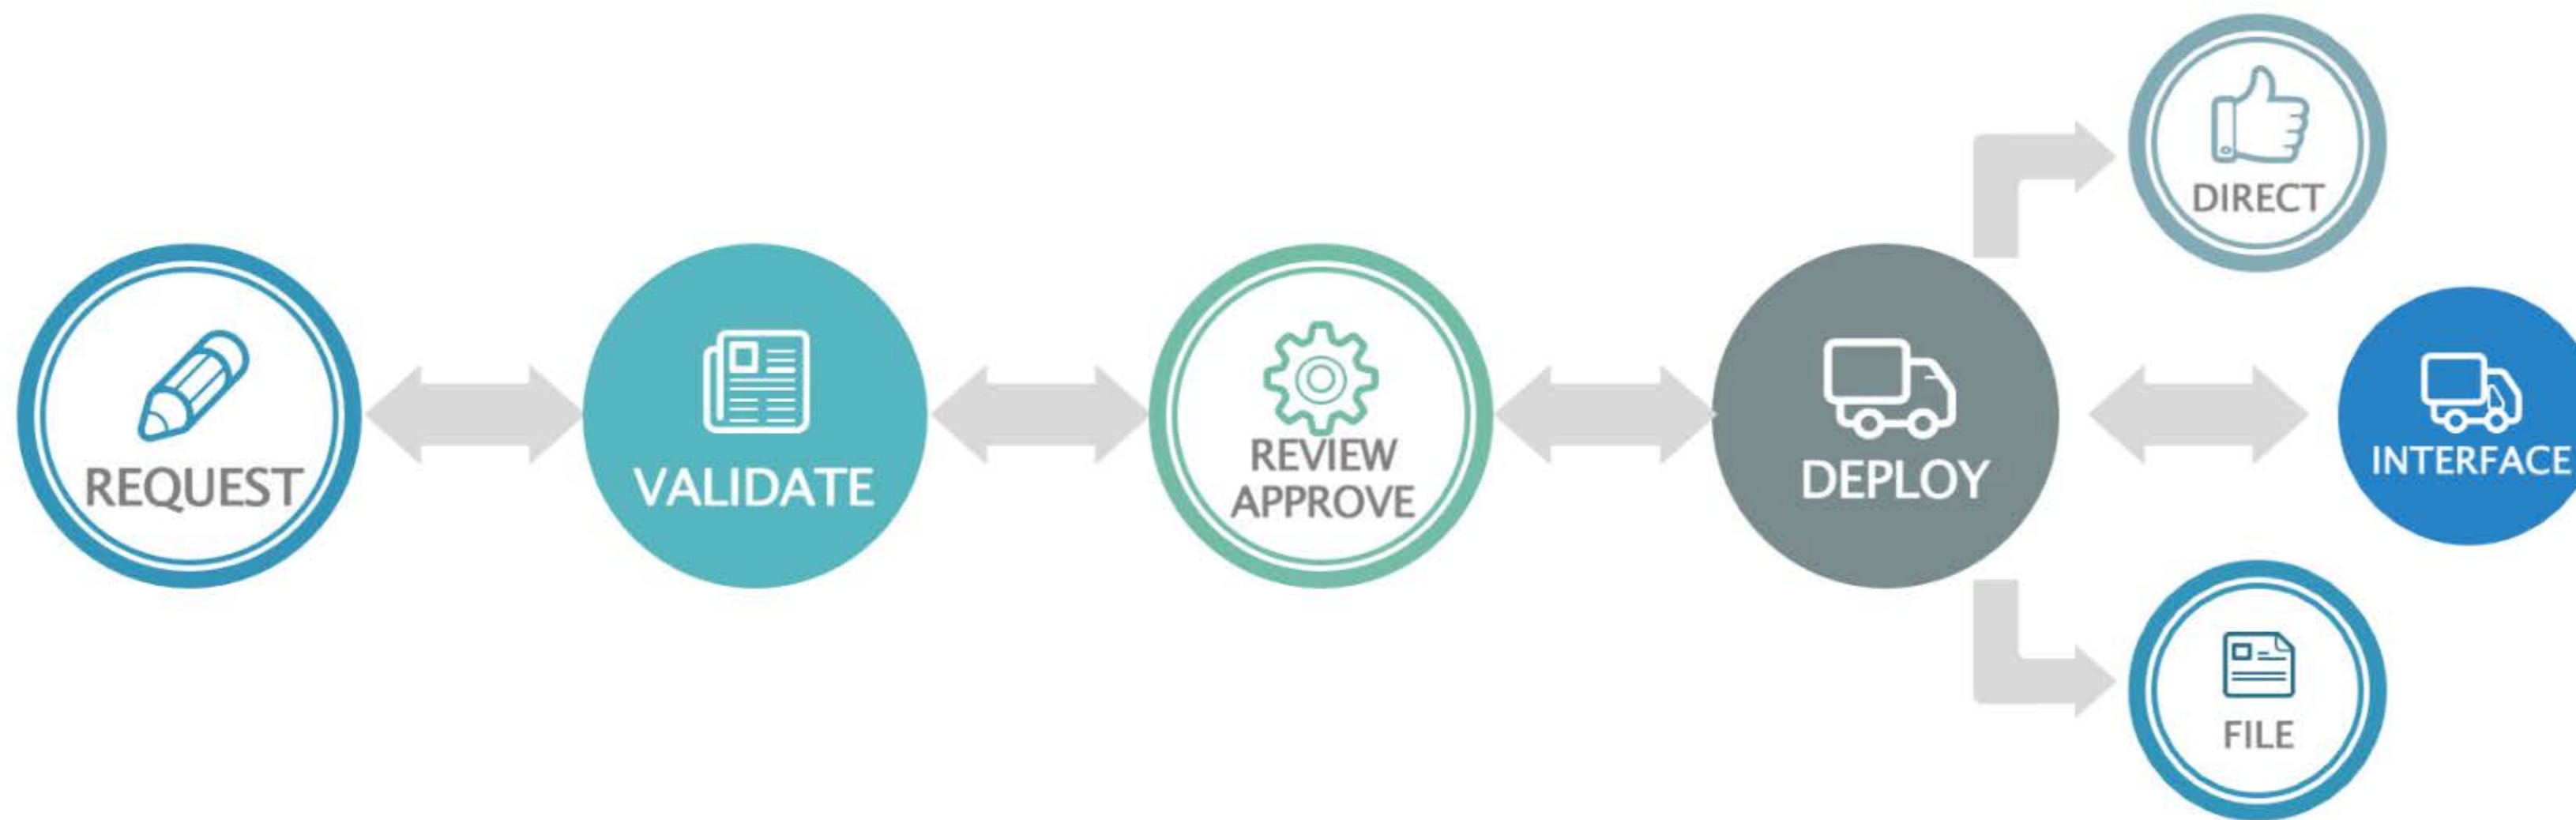

1. Create metadata requests via web application
2. Submit requests into a workflow
3. Workflow guides the request to reviewers and approvers
4. Monitor real time progress in the dashboard
5. EPMware deploys metadata to the target application(s)

Interactive Workflows

Visibility and traceability of metadata requests mean happy users and auditors

Multiple Approvals – Notifications – Segregation of duties

EPMware notifies reviewers and approvers via email of pending sign-offs.

HFM to FCCS conversion – manual process

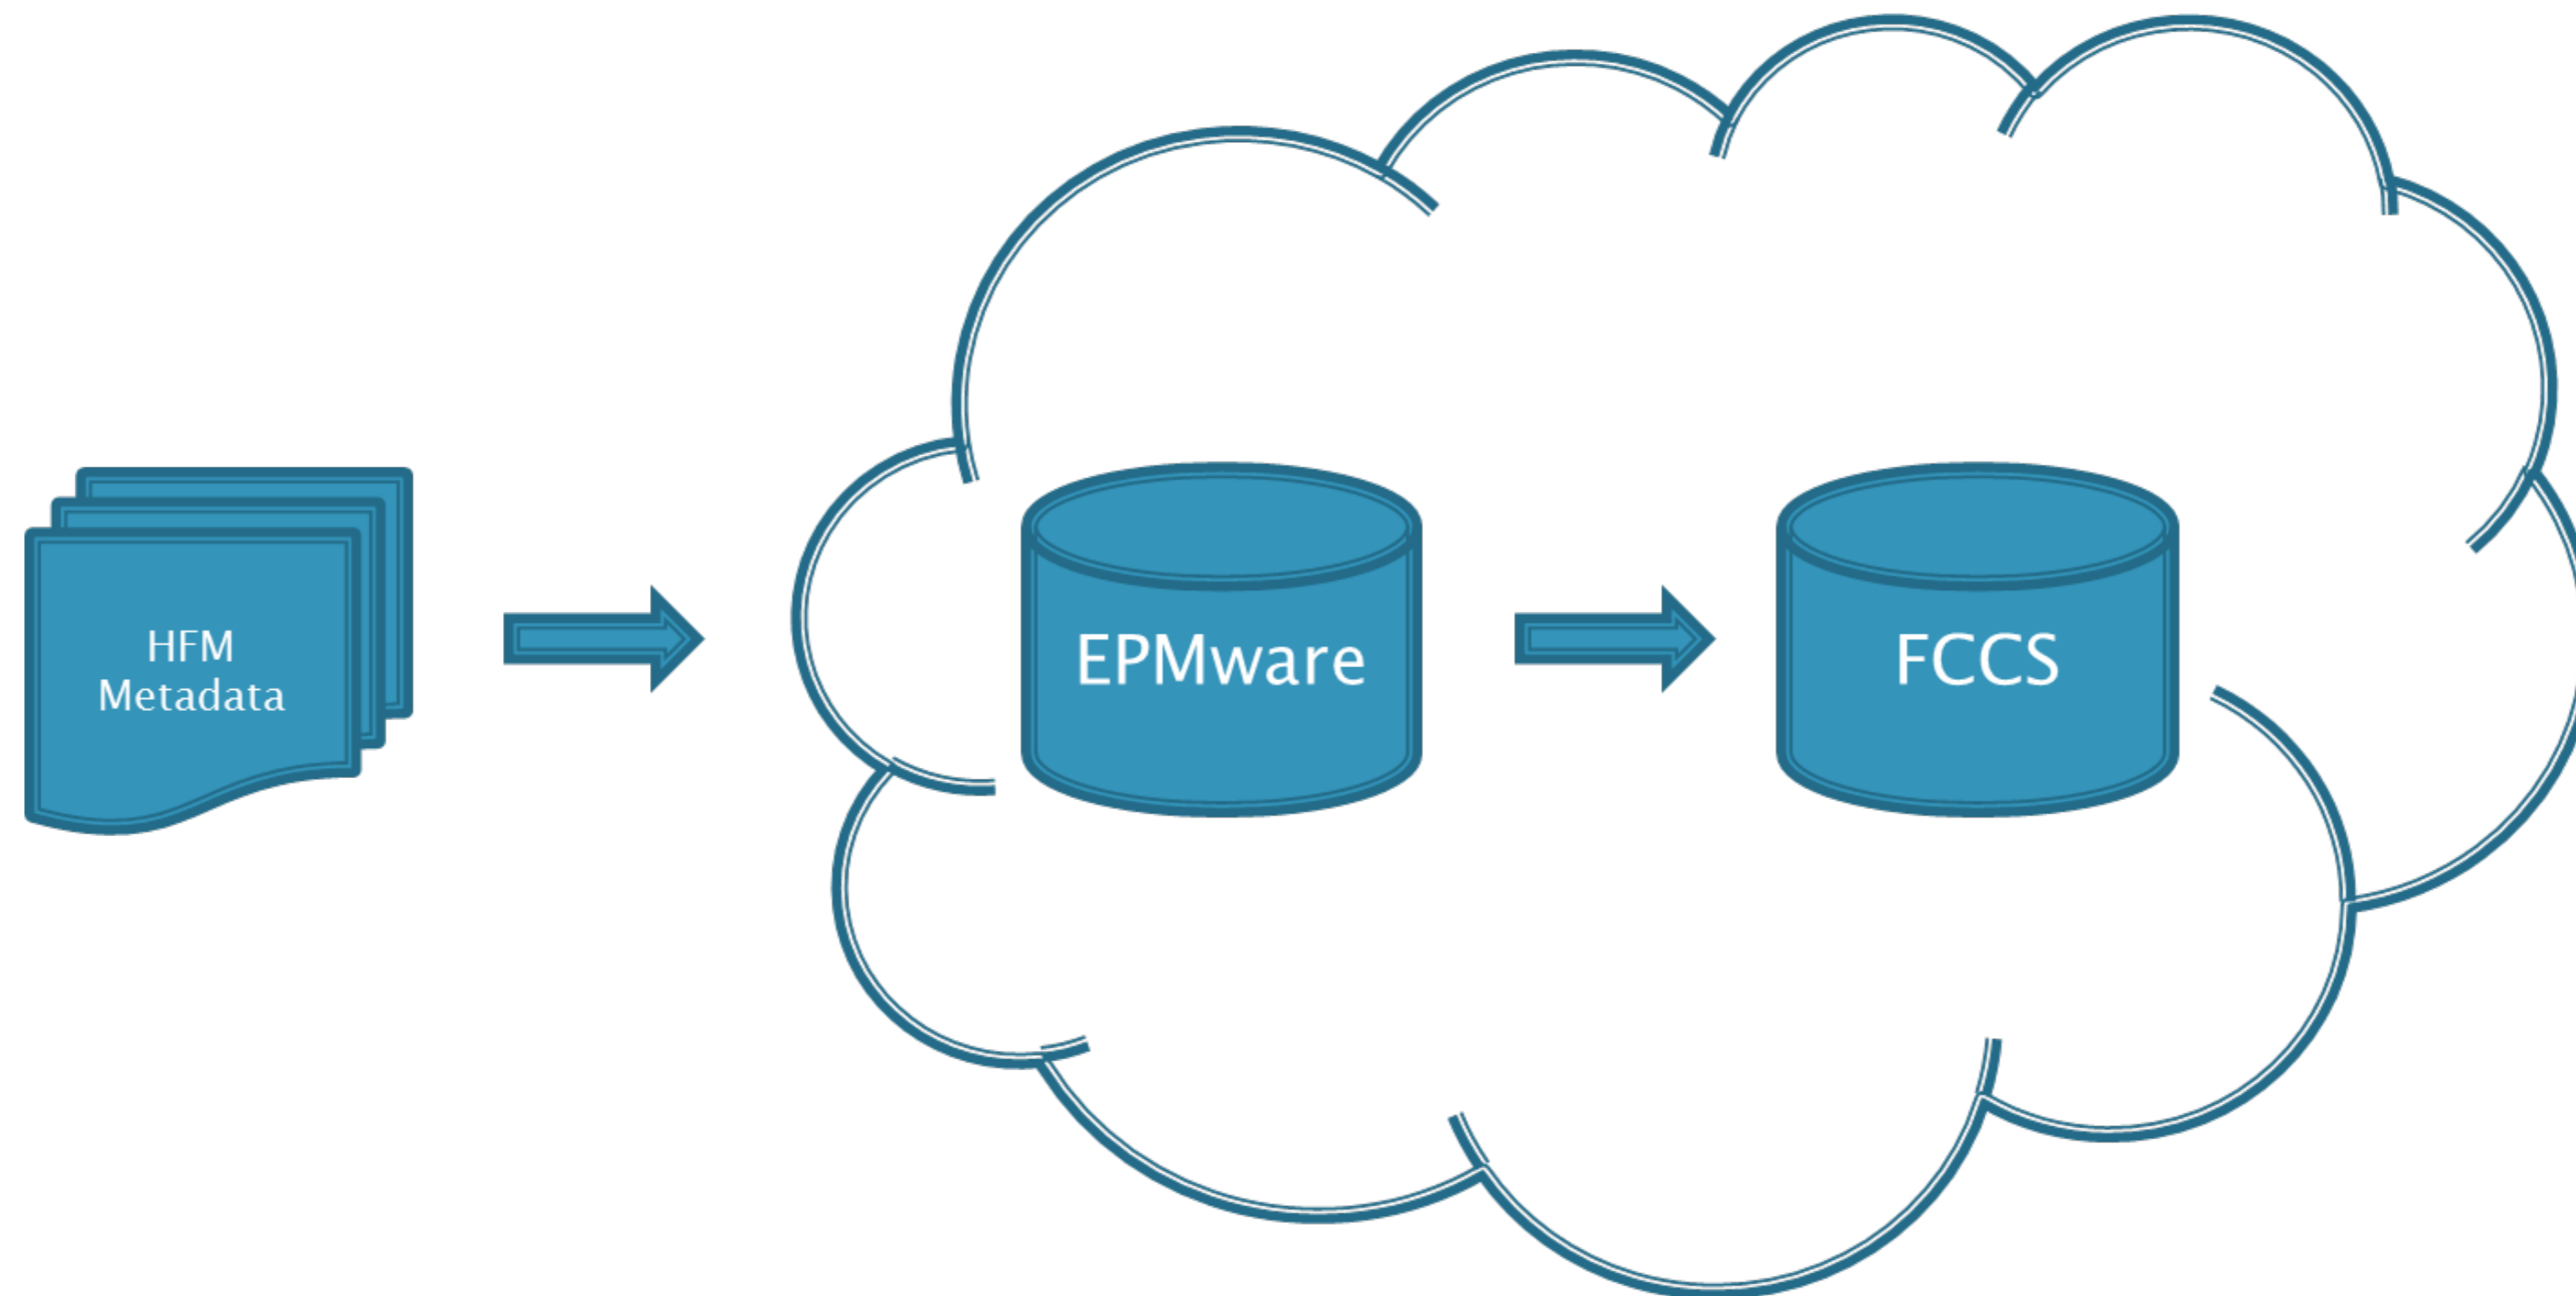

- **HFM metadata has to be manually converted**
- **Iterative process during the implementation phase**
- **HFM metadata export not compatible with FCCS**
- **HFM has relation database FCCS uses Essbase**

HFM to FCCS conversion – using EPMware

Advantages:

- **Convert your HFM metadata file in minutes.**
- **Instant cloud integration to FCCS - directly load metadata and refresh application in one click.**
- **Full Audit trail with reporting of how HFM was converted to FCCS.**
- **Save a historical version of the HFM hierarchy in EPMware for reference.**
- **Save consulting hours for HFM to FCCS conversions.**
- **Use EPMware with Oracle EPM Cloud and the on-premise Hyperion suite as well.**

HFM to FCCS in EPMware

HFM to FCCS conversion – step by step

- **Import FCCS application into EPMware**
- **HFM to FCCS Dimension mapping in EPMware**
- **Import HFM application metadata file into EPMware**
- **Move HFM members into new FCCS hierarchies**
- **Delete HFM_Legacy hierarchy from each dimension after all needed members have been moved**
- **Finish updating FCCS unmapped member properties.**
- **Deploy application to FCCS**
